Creative Thinkers Wanted to Take Computer Science!

Computer Science Careers and Salaries

Systems Analyst | $87,220

Multimedia Artist and Animator | $65,300

Software Developer | $102,280

IDEAS COME TO LIFE

From 3-D animation to medicine, fashion, and engineering, computer science powers the innovations that drive the world. **Taking computer science** will help you understand how computing and technology influence the world around you. You will create digital projects, such as games and apps, to address real-world issues in the same way writers, programmers, engineers, and designers do.

PROJECT POSSIBILITIES

Computer science skills can help you:

- Create apps to track health data and provide suggestions to live healthier
- Program models and experiments that answer biology, physics, and sociology questions
- Create a website to raise awareness for a cause you care about
